

KANAKUK

AIRPORT SHUTTLE SERVICE

For our families planning to travel to Kamp by air, here are a few enhancements we're implementing for this summer.

COVID-19 SAFETY MEASURES:

- All Kampers must wear a face mask when they enter the airport, while in flight, and while riding on our airport shuttle to Kamp.
- We also ask that Kampers try to avoid large crowds, distance from others, avoid touching surfaces as much as possible, and carry and use hand sanitizer regularly.
- **Your child MUST have a completed Health Screening Form with them to give to Kamp staff upon arrival at the airport, and they will not be allowed in Kamp without it.**
- We're committed to cleaning and sanitizing our shuttles prior to every trip to pick up Kampers at the airport.
- Kampers will have their temperature taken upon check-in. If their temperature is above 100.0°, we'll contact you immediately and make arrangements for their safe trip home. If a flight for that day cannot be secured, we will deliver them to our quarantined lodging at Kamp and secure a flight for the following day. PLEASE NOTE: If taken to Kamp and they test positive for COVID-19, they cannot be transported for a commercial flight, and will have to be picked up in person.
- Medical grade disposable masks will always be worn by our staff in the airport and during the ride to Kamp, and hand sanitizer will be used before boarding our transportation.
- **ALL Kampers must fly home on Friday, as no stayover till Saturday will be allowed.**

Thanks for trusting us with your child! We cannot wait for them to get here!

Sharon Smith

Transportation Director
